ABOUT US

Integrated Oilfield Services Solutions Provider

Gulf Subsea is a specialised oilfield services provider delivering integrated solutions that support the full lifecycle of offshore and onshore energy operations. Our capabilities include Workover Services, Perforation Services, Slickline Services, and Subsea Engineering Solutions which are designed to enhance production, reliability, and safety. With decades of industry experience, we serve clients across the oil & gas, energy, and industrial sectors within South East Asia.

GLOBAL KNOWLEDGE. SOUTH EAST ASIA FOCUS.

Headquarters
in Kuala Lumpur, Malaysia

Corporate Offices
in Bangkok, Thailand

Operational Bases
in Kemaman, Malaysia,
Kamphaeng Phet &
Songkhla, Thailand

WORKOVER SERVICES

Maximising Well Performance & Asset Life

Gulf Subsea delivers comprehensive workover solutions designed to enhance well productivity, restore production, and extend asset lifespan. Supported by our Hydraulic Workover Units and experienced operational teams, we provide safe, efficient, and cost-effective intervention services with minimal downtime.

CORE CAPABILITIES

Hydraulic Workover Operations

- Hydraulic Workover Unit 340K
- Workover Unit 150K
- Well Re-completion Services
- Production Enhancement Programmes
- Well Intervention Operations

Well Maintenance & Remediation

- Sand Cleanout Operations
- Fishing Operations
- Well Restoration Services
- Production Optimisation Support

Equipment Installation & Retrieval

- ESP Installation Services
- Beam Pump Installation
- Tubing Conveyance Operations
- Completion Equipment Deployment

Specialised Intervention Services

- Perforation Support
- Underbalanced TCP Operations
- Well Integrity Support
- Mechanical Intervention Services

PERFORATION SERVICES

Reliable Well Completion & Reservoir Access Solutions

Gulf Subsea delivers comprehensive perforation services for both development and existing wells, providing safe, efficient, and precise reservoir access through advanced E-Line and TCP technologies. Our solutions support a wide range of completion configurations while ensuring compatibility with all major explosive providers for seamless field integration.

CORE CAPABILITIES

Perforation Services

- E-Line Perforation Services
- Tubing Conveyed Perforation (TCP)
- Monobore Completion Perforation
- Single-Zone Completion Perforation
- Multi-Zone Completion Perforation
- Additional Perforation on Existing Wells
- Development Well Perforation Programmes

Cased Hole Logging Services

- Gamma Ray Logging
- Casing Collar Locator (CCL)
- Cement Bond Logging (CBL)
- Bottomhole Pressure Surveys
- Leak Detection Services

Well Intervention Support

- Tubing Cutter Services
- Casing Cutter Services
- Downhole Safety Valve (DHSV) Operations
- Master Valve Operations

Safety & Compliance

- Explosive Licence Management
- Explosive Operations Handling
- Safe and Efficient Deployment Procedures

SLICKLINE SERVICES

Efficient Well Intervention & Recovery Solutions

Gulf Subsea provides comprehensive Slickline and Braided Line services designed to enhance well performance, ensure operational reliability, and support critical well intervention activities. Backed by experienced personnel and specialised equipment, we deliver efficient, safe, and cost-effective solutions tailored to meet diverse operational requirements.

CORE CAPABILITIES

Slickline Services

- Setting and Retrieval of Plugs & Standing Valves
- SPX Plug Operations
- XX Plug Operations
- XX Standing Valve Operations
- Mechanical Well Intervention Services
- Routine Well Maintenance Activities

Well Diagnostics & Evaluation

- Flowing MPLT Surveys
- Bottom Hole Pressure (BHP) Surveys
- Flowing Bottom Hole Pressure (FBHP) Surveys
- Memory Multi-Fingered Caliper Surveys
- Memory Magnetic Thickness Surveys
- Well Integrity Assessment

Fishing & Recovery Services

- Custom Fishing Packages
- Downhole Tool Recovery
- Obstruction Removal Operations
- Well Recovery Solutions
- Mechanical Troubleshooting Support

Operational Resources

20+

Slickline Units

6+

Braided Line Units

ROV & DRONE SOLUTIONS

Operational Excellence Through Advanced Technology Solutions

Gulf Subsea offers end-to-end inspection, survey, UAV manufacturing, and competency development solutions. Our integrated capabilities in ROV operations, drone technologies, system integration, and specialised training enable clients to enhance asset performance, reduce operational risk, and drive greater project efficiency.

CORE CAPABILITIES

Remotely Operated Vehicles (ROV)

- Underwater Inspection & Observation
- Asset Integrity Assessment
- Pipeline & Cable Inspection
- Construction Support Operations
- Offshore Infrastructure Monitoring

Drone Inspection & Survey Solutions

- Drone Inspection Services
- Aerial Survey & Mapping
- Asset Integrity Inspections
- Photogrammetry & 3D Modelling
- Thermal & Visual Inspections
- Data Capture & Analysis

Manufacturing & Integration

- Drone Manufacturing
- Custom Drone Design & Integration
- UAV Parts & Components
- Payload Integration Solutions
- Research & Development Support

Training & Certification

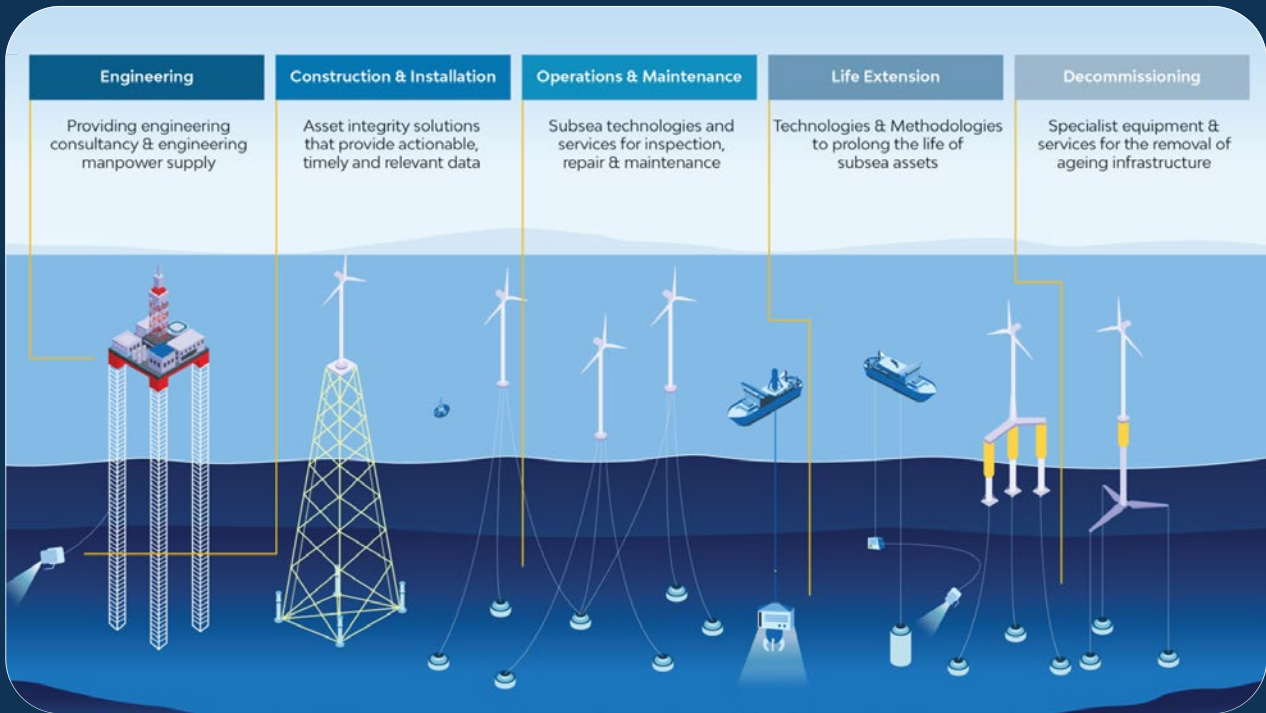

- Drone Pilot Training
- UAV Certification Programmes
- Operational Competency Development
- Safety & Regulatory Compliance Training

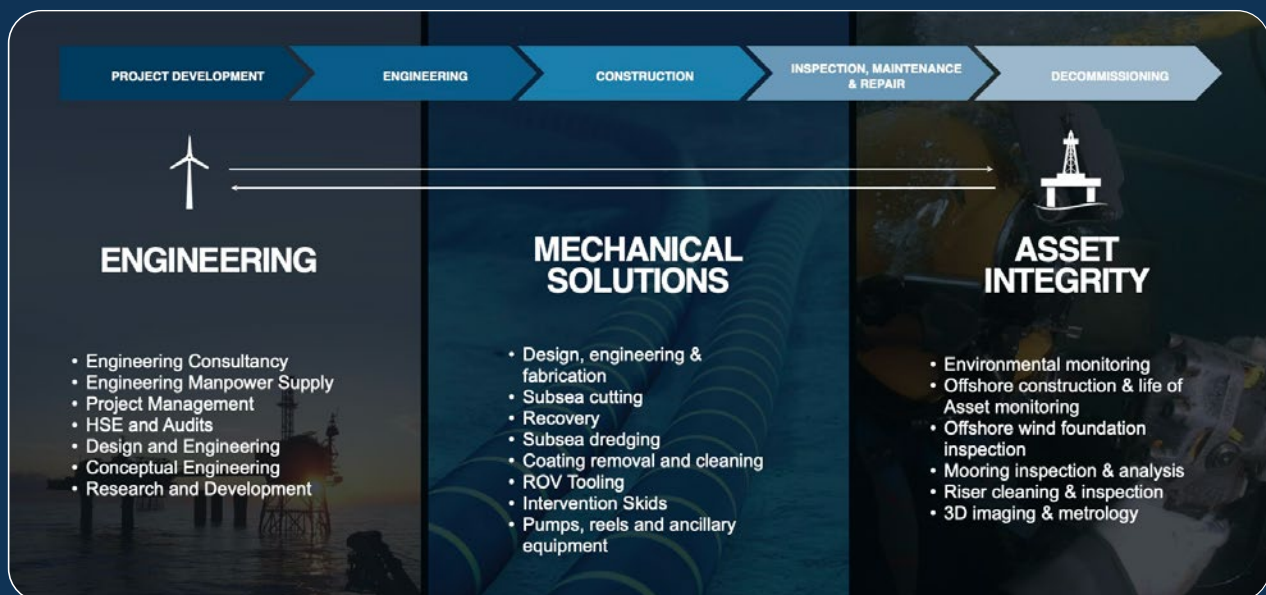

ENGINEERING SERVICES

Expertise in the full project lifecycle

Combining technical expertise, advanced survey technologies, engineering consultancy, mechanical solutions, and asset integrity services, we provide integrated support that enhances operational performance, reduces risk, and maximises asset value throughout every stage of the project lifecycle.

OUR EXPERTISE

Gulf Subsea Sdn. Bhd.

Menara Atlan, 161B Jalan Ampang,
Suite 1-01, 1st Floor, 50450 Kuala Lumpur, Malaysia

Gulf Subsea (Thailand) Company Limited
